SUMMARY

CSE (AI) student with hands-on experience building **full-stack and AI-powered applications** using C++, Python, JavaScript, React.js, Node.js, Express.js, MongoDB, and REST APIs. Strong foundation in **Data Structures and Algorithms, OOP and DBMS**, with experience developing practical software projects and working across **frontend, backend, API integration, debugging, testing, and AI-assisted development**.

EDUCATION

Bachelor of Technology in CSE (AI)

NIET Greater Noida | CGPA: 8.29/10

Greater Noida, UP

2023 – 2027

EXPERIENCE

Full Stack Development Intern – CodeAlpha

Virtual Internship

Remote

Aug 2025 – Sep 2025

- Developed **full-stack web applications** using the MERN stack, implementing responsive user interfaces and complete application workflows.
- Built and integrated **RESTful APIs** with frontend components and MongoDB to implement data-driven application functionality.
- Worked across the **frontend and backend development lifecycle**, including feature implementation, API integration, debugging, and application testing.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL

Frontend: React.js, HTML, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, WebRTC, Socket.io

Databases: MongoDB, PostgreSQL

AI & Development Tools: Gemini API, Cursor, Claude Code, GitHub Copilot, ChatGPT/Codex, Gemini Code Assist, Antigravity

Tools: Postman, MongoDB Compass, VS Code, Git, GitHub

Core CS: Data Structures & Algorithms and Object-Oriented Programming (OOP)

PROJECTS

AI Mock Interview Platform (MERN, Gemini API, MediaPipe)

[GitHub](#) | [Live](#)

- Built an **AI-powered mock interview platform** that analyzes resumes and generates personalized interview questions based on candidate profiles.
- Implemented **browser-based video interviews** with voice interaction, video recording, and **MediaPipe** for facial and posture analysis.
- Added a **Monaco-based coding environment**, AI answer evaluation, follow-up questions, performance analytics, and interview replay.

Payment Processing System (MERN, Node.js, Express, MongoDB, JWT)

[GitHub](#) | [Live](#)

- Built a **full-stack payment processing system** with order creation, payment checkout, transaction tracking, retry handling, and admin analytics for **card, UPI, net banking, and wallet** payment flows.
- Implemented **idempotency protection** using request keys and cached responses, along with retryable payment workflows, separate order/payment lifecycles, and detailed transaction logging for reliable payment processing.
- Developed secure **JWT authentication and role-based access**, request validation, rate limiting, card masking and hashing, and **webhook** generation/verification using modular Node.js/Express REST APIs.

ACHIEVEMENTS

- LeetCode:** **Knight Badge** holder; solved **700+** problems with a peak rating of **1900+ (Top 5% globally)**.
- CodeChef:** **3-Star** Coder (Max rating **1600+**); consistently ranked among the top 100 in divisional coding contests.
- Codeforces:** Achieved **1200+** rating, demonstrating advanced algorithmic problem-solving under time constraints.

CERTIFICATIONS

- Data Structures & Algorithms using C++ – Coding Blocks** (Completed comprehensive program in advanced DSA and C++ concepts)
- Advanced Frontend (React JS), Node JS & Web Development – Incapp** (Completed offline classroom training in full-stack engineering)
